Savannah Development and Renewal Authority

Thorpe Residence

2205 Martin Luther King Jr., Blvd. Savannah, GA
Cuyler-Brownville NRHP Historic District

Illustrated History. North is at the top.

1898

The 1898 Sanborn Fire Insurance Map illustrates the earliest development of the block. One two-story wood framed dwelling has been constructed by this time, and Wells Park is laid out across the street. Early division of the lots were oriented north-south, with the established property developed in an east-west orientation. The subject property is not yet developed but its approximate location is outlined in red.

1916

The 1916 Sanborn Fire Insurance Map illustrates the development pattern of the block. It comprised of 1- and 2-story attached and semi-attached wood frame dwellings, with 1-story accessory buildings along the lane. Buildings south of 38th street along West Broad were built in the east-west orientation and the former eastern portion of West 38th Street lane was reconfigured to allow for a buildable lot to front West Broad Street.

2205 West Broad Street is shown as a 2-story detached wood frame dwelling with a full-width one-story front porch and a 1-story accessory building on the lane. A one-story room is shown on the south side of the west end of the house.

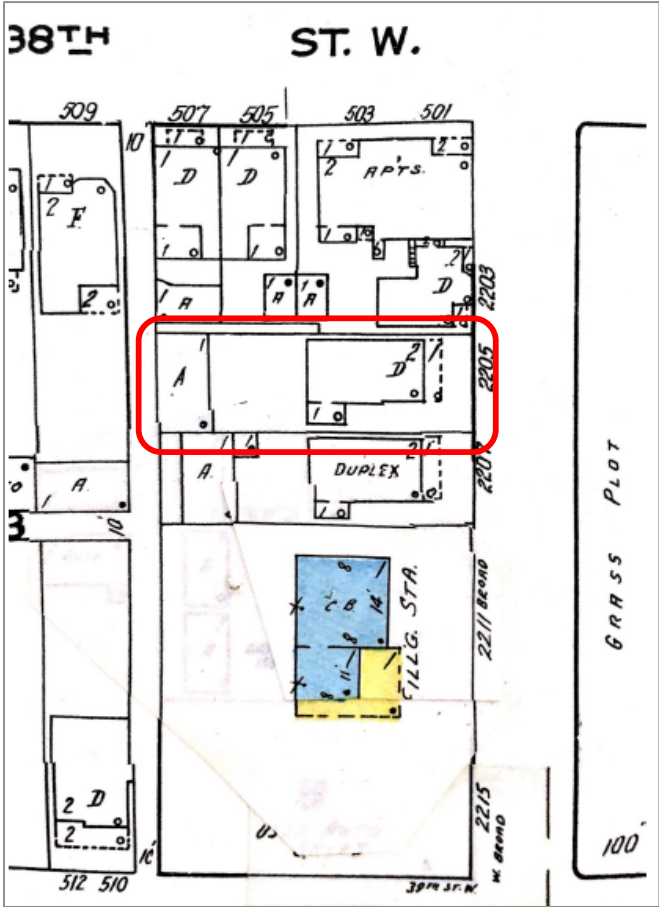

1936

The Savannah Cadastral Survey, conducted in November 1936, portrays similar footprints as the prior 1916 Sanborn Map. The images illustrate a 2-story home with a 1-story front porch. The small 1-story room on the south façade at the west end is also depicted. The accessory building is noted as a wood frame 2-car garage. A hip roof surfaced in tin is identified over the principal structure.

1954

The 1954 Sanborn Fire Insurance Map depicts no significant changes to the subject building. The accessory structures may have been altered to more closely correspond to the dimensions noted in 1936. Iron cladding is noted on the lane side (west) of the auto-related structure.

1966
 The 1966 Sanborn Fire Insurance Map depicts no significant changes to the subject buildings although the southern massing along 2207's south façade is shown. Additionally, a small 1-story addition is noted on the garage building at 2207.

Most notable in this map is the redevelopment of the southern portion of the block. A filling station has replaced the residence that stood to the south of the subject property.

2010
 The Chatham County Tax Assessor's property card shows the building at 2205 having a slab porch with roof on the west end of the home. This graphic is shown in the annual property record card through 2016 although both the rear porch and small one-story southern massing were removed prior to 2013, as evidenced in dated photographs. No accessory buildings are noted in the assessor's information.

COLOR DISCLAIMER

As color experts, we know getting the shingle color right is a big part of any roofing purchase. Due to printing color variations, in addition to viewing shingle literature, we suggest you request an actual shingle sample to see how it will appear on your home and with your home's exterior elements in various natural lighting conditions. Lastly, we recommend you verify your color choice by seeing it installed on an actual home; your roofing contractor or supplier can provide a sample and may be able to direct you to a local installation.

DESCARGO DE RESPONSABILIDAD SOBRE LOS COLORES

En tanto que especialistas en color, sabemos que obtener el color de teja perfecto es una parte importante en toda compra de techos. Debido a las variaciones en los colores impresos, además de mirar folletos de tejas, le sugerimos que solicite una muestra de la teja para ver como se verá en su hogar y con los elementos externos de la vivienda bajo distintas condiciones de luz natural. Finalmente, le recomendamos que para verificar su elección de colores, vea cómo lucen las tejas ya instaladas en una vivienda; su contratista de techos o su proveedor le pueden dar una muestra e incluso indicarle dónde ver un techo ya instalado.

A classic look that stands the test of time.
