

STRANGE BIRD | PYLON SIGN FACES

Two new single sided logo signs to be installed into the existing pylon sign, as shown in the below rendering. The signs will be constructed of 1/2" thick flat cut acrylic letters and logo forms, painted PMS Black 7. The faces will feature full color printed, laminated and die cut applied vinyl applications for the detail and coloring of the letters and logo. The letters and logo forms will be stud mounted to [2] metal backers (provided by others) using stud mounts and 1/2" spacers. The new faces will be installed within the existing frame, on both sides of the pylon sign, using screws and brackets. The fonts used for the sign are custom logo fonts and the signs are not illuminated.
