L Remarks:

SFD units responded to the dispatched location for report of a structure fire. Upon arrival, Engine 4 established command with smoke and flames visible from the Alpha/Delta sector in defensive fire attack mode (large vacant two-story commercial/residential multiuse wood frame building). Rescue 1 arrived on scene and began assisting locating an adequate water supply. Engine 8, Engine 5, and Engine 3 arrived on scene. A water supply was located midway down Old West Lathrop and Engine 3 began laying LDH into the scene to supply Engine 4. Truck 5 arrived on scene and began putting the aerial in service to begin defensive extinguishment. Battalion 1 arrived on scene and assumed command from Engine 4 noting heavy smoke and flames visible. Rescue 1 was assigned a primary search through the Alpha sector, moving from the seat of the fire in the Alpha/Delta sector to the Alpha/Bravo to Bravo sector rear areas. Hazmat 2 arrived on scene and set up the command post in front of the building's Alpha Sector. I/C BC1 requested arson investigator to the scene, Fire Marshal 2 and ATF notified by dispatch. I/C BC1 also requested Rehab 1 and two additional Engine units for manpower and suppression, Engine 12 and Engine 2 were dispatched (Engine 9 canceled). I/C relocated Engine 5 to the Alpha sector to put the deck gun in service along with two 2.5-inch handlines, supplied by Engine 4. Due to rapidly deteriorating conditions on the Bravo side, I/C BC1 requested Dispatch sound the evacuation ton...

SFD units responded to the dispatched location for report of a structure fire. Upon arrival, Engine 4 established command with smoke and flames visible from the Alpha/Delta sector in defensive fire attack mode (large vacant two-story commercial/residential multiuse wood frame building). Rescue 1 arrived on scene and began assisting locating an adequate water supply. Engine 8, Engine 5, and Engine 3 arrived on scene. A water supply was located midway down Old West Lathrop and Engine 3 began laying LDH into the scene to supply Engine 4. Truck 5 arrived on scene and began putting the aerial in service to begin defensive extinguishment. Battalion 1 arrived on scene and assumed command from Engine 4 noting heavy smoke and flames visible. Rescue 1 was assigned a primary search through the Alpha sector, moving from the seat of the fire in the Alpha/Delta sector to the Alpha/Bravo to Bravo sector rear areas. Hazmat 2 arrived on scene and set up the command post in front of the building's Alpha Sector.

I/C BC1 requested arson investigator to the scene, Fire Marshal 2 and ATF notified by dispatch. I/C BC1 also requested Rehab 1 and two additional Engine units for manpower and suppression, Engine 12 and Engine 2 were dispatched (Engine 9 canceled). I/C relocated Engine 5 to the Alpha sector to put the deck gun in service along with two 2.5-inch handlines, supplied by Engine 4. Due to rapidly deteriorating conditions on the Bravo side, I/C BC1 requested Dispatch sound the evacuation tones to cease Rescue 1's primary search operation while also notifying any personnel near or inside to evacuate immediately. Visual and radio contact was made with Rescue 1 by I/C BC1 and HM2, all units clear of the interior of the building. HM2 performed a PAR check to verify all units were accountable, all units were PAR. Operations immediately resumed.

Engine 12 and Engine 2 arrived and assisted with securing an additional hydrant at Old West Lathrop and Augusta Avenue. That hydrant had poor pressure, and the supply was reestablished to another hydrant further east on Augusta at the next intersection, blocking Augusta Road. Savannah PD assisted with traffic control due to the water supply blocking the road. Due to low and inadequate water supply pressure hindering suppression operations, I/C BC1 requested Dispatch contact the Savannah Water Department to increase the water pressure to the hydrant grid we were operating from. Per request of I/C BC1, Engine 3 apparatus was relocated to connect in line at the Old Lathrop water supply to boost and relay pressure to Engine 4 to increase water pressure. This action was successful, and operations began to make an impact on fire suppression operations. COS Water Department were able to also increase water pressure on the grid shortly after. A total of 3700 feet of LDH was utilized at the scene.

Personnel from Engine 8 and Engine 5 began fire suppression in the Charlie sector making an aggressive push to stop fire spread in the attic of the Bravo/Charlie rear corner, which

was successful. One of Engine 8's personnel were mildly injured during this operation. Safety 1 was notified, and the firefighter was cleared and injury documented. Fire Marshal 2 and ATF agent arrived on scene and began an exterior investigation. No interior investigation was able to be completed due to ongoing operations and interior conditions being unstable and dangerous. Engine 3 personnel were tasked with removing all boarded window coverings and performed extinguishment operations on the Bravo sector for the remainder of the incident. The fire was declared "under control" by I/C.

Throughout the remainder of the operation, all personnel on scene utilized 1.75-inch, 2.5-inch, deck gun, and aerial master stream device to thoroughly extinguish the area from a defensive fire attack position. Once this operation made adequate progress, E5 and E8 crews began an interior push from the Charlie sector to begin extinguishing flames trapped in the deteriorated interior areas. This was successful and the fire was declared "out" by I/C. Crews on scene began demobilizing equipment, manpower, and water supplies. Engine 13 was staged at Station 4 to fill in and responded to the scene to assist with demobilization. All LDH was picked up by crews on scene except the original water supply halfway down Old West Lathrop (1000' supplying E4). Water supply was transferred to E3 apparatus from E4 apparatus and E3 apparatus supplied Truck 5 with an aerial water supply. All units returned to available status with the exception of E3, T5 and BC1.

Engine 1 and Truck 1 personnel responded to the scene per request of I/C BC1 to relieve Engine 3 and Truck 5 personnel. E1 swapped apparatus with Engine 3 and I/C was passed to E1 from BC1. In coordination with Truck 1, E1 continued salvage and overhaul/extinguishment at the scene. At completion of their tour (2300 hours) E1 was relieved by Engine 6 and swapped apparatus with E6 and reported to HQ to swap E6 apparatus with E3. Truck 12 relieved T1 and resumed aerial operations. On 5/18/25 at 0100, E9 and T13 were dispatched to relieve E6 and T12 to continue monitoring the scene until it was mitigated.
