**Re: Support for the Hotel Development Overlay Text Amendment**

Dear Members of the Metropolitan Planning Commission:

I want to share my support for the proposed Hotel Development Overlay Text Amendment. Our historic neighborhoods are the heart of this city, and they're special because they're not just for visitors—they're real communities where people live, raise families, and run small businesses.

We are all well aware that tourism is a significant part of Savannah's economy, and we all benefit when it's managed well. But in recent years, hotel growth has sometimes felt overwhelming, especially when it pushes into areas meant for residents. This amendment sets fair and common-sense boundaries so that hotels can grow in the right places, while still protecting homes and small streets from being swallowed up by commercial use.

This amendment doesn't stop growth—it simply makes sure growth is done responsibly. It helps create a fair playing field for small businesses while keeping our neighborhoods livable and welcoming. That's the kind of future I want for Savannah.

Thank you for your consideration and for working to keep Savannah a great place to both live and work.

Sincerely,
